

ALL-LASER LASIK: LIFE WITHOUT RESTRICTION

LASIK is among the world’s most commonly performed vision correction surgeries, and here at Carter Eye Center, we have significant experience with this life-changing procedure. In fact, we’ve helped tens of thousands of people just like you seize the opportunity to enjoy life with improved vision, free from the hassles of glasses and contacts.

Reasons for choosing LASIK are as unique as people themselves, but there is a common denominator. Everyone wants what LASIK has to offer – excellent vision without the hassle of glasses or contact lenses.

LASIK is safe, effective and is associated with very few side effects. It uses sophisticated laser technology to treat nearsightedness, farsightedness and astigmatism. If you’re wearing glasses and/or contacts, and you fall into one (or even two) of these categories, then All-Laser LASIK may be the right choice for you.

HOW DOES LASIK WORK?

LASIK works by changing the shape of your cornea, which in turn changes the way images focus on your retina. It’s technically a two-step process: creating a small flap on the cornea, and then reshaping the corneal surface, all in just a few minutes. Even though it’s been around a long time, LASIK remains the world’s most popular form of vision correction surgery. According to **The American Refractive Surgery Council, LASIK enjoys an unprecedented 96% patient satisfaction rate, the highest of any elective ophthalmic procedure.**

WHY TRUST US FOR YOUR LASIK?

Carter Eye Center uses advanced All-Laser LASIK techniques for a greater level of safety with optimal results. During your Custom All-Laser LASIK procedure, we will treat your eye’s “fingerprint” using advanced eye tracking to achieve the best possible outcome. All custom LASIK procedures are performed in our state-of-the-art, in-house LASIK suite, bringing comfort and convenience to a whole new level.

We have performed tens of thousands of successful LASIK procedures. Trusting us to perform your LASIK is a privilege we take seriously.

If LASIK isn’t right for you, rest assured, we have a procedure that likely is.
